Date of birth: 31st August 1997
Date of Issue: 27th July 2018

Ashu's purpose of visit and business visa requirement request:

Rackspace Technology Inc and its wholly owned subsidiary, Tricore Solutions provide the underlying technology infrastructure and compute power as a partner and key supplier to Trading Point Holdings Ltd. for more than 10 years. Ashu Rana is a highly valued Lead DevOps Engineer specializing in Cloud infrastructure providing architecture design and technology implementation for Trading Point and is a critical member of the engineer team at TricoreSolutions having worked exclusively with Trading Point for several years. Ashu's work is mostly delivered remotely but there is a major transformation project underway that involves the migration of IT services from dedicated infrastructure to AWS. This work requires intensive planning and coordination between teams and engineers and these planning sessions are far more effective when engineers and project managers can be in the same room together, thus the reason for Ashu's visit to Trading Point office in Athens.

- The program of works requires a collaborative working sessions to take place in Trading Point Holdings Ltd.'s Athens office to ensure that the project is delivered according to requirements.

- Ashu is required to be present in the Athens office of Trading Point Holdings Ltd. from 10th March – 14th March 2025, to ensure that she can engage with product owners during critical planning and project review sessions.
- If Ashu is not able to attend these sessions in person, then her contribution will be limited, and this will negatively impact the project and business relationship.
